

MimioQuickLearn

MimioStudio Basics III: Adding Content

This one-hour, live, online training session gives participants a working knowledge of how to import content into their Mimio lessons. Participants will learn various methods for adding content. They will be able to practice their new skills during the session, and to consider ways they can apply what they've learned to their own teaching.

Participants will:

- Create exercises with MimioStudio ActivityWizard
- Add content using the Copy/Paste method.
- Add content using the Screen Clipping method.
- Import content into MimioStudio™ Notebook using the Insert menu.
- Import content into MimioStudio Notebook using the Import File button.

During the session, participants will have the opportunity to ask questions and interact with the software. Participants who successfully complete the session will advance their Mimio skills and understand how to use MimioStudio software more effectively.

We encourage participants to attend additional sessions to maximize their abilities with Mimio products and bring their teaching into the 21st century!
