

ProColor Series 3 Firmware Release Notes

February 2021

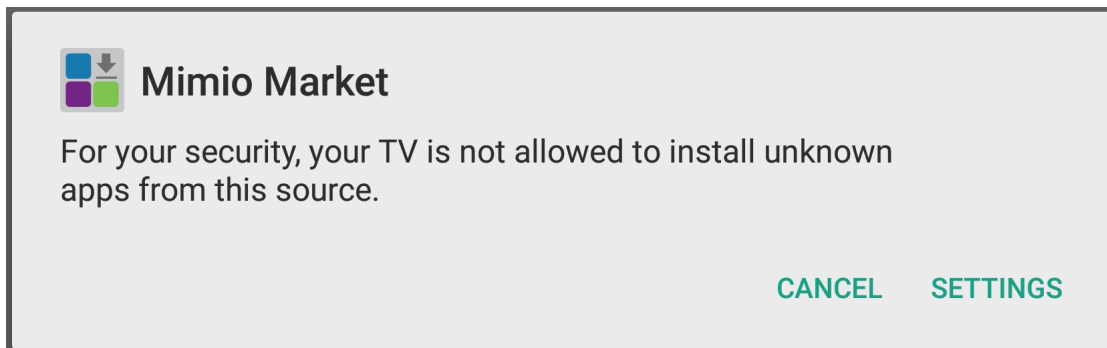

MimioMarket App

The long-awaited App Store is now available on the Procolor Series 3 panels. MimioMarket provides access to over **100 safe and vetted apps for education**.

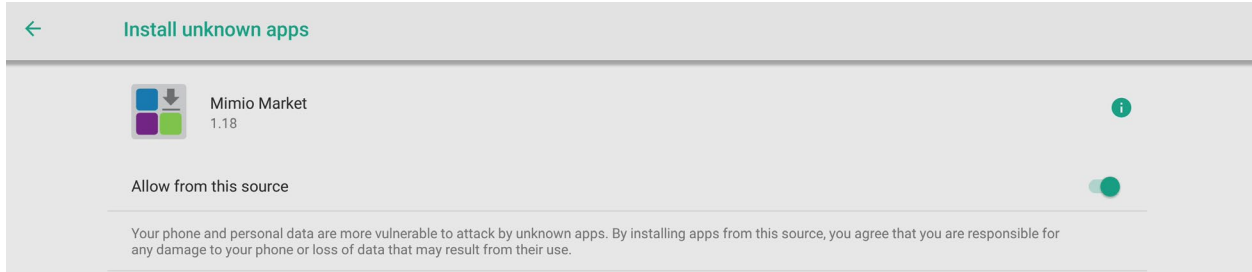

Getting Started

The first time that you install an app you may see this window if your IT department has not already updated the panel's settings.

- Click on Settings.
- Turn on Allow Apps from this Source.

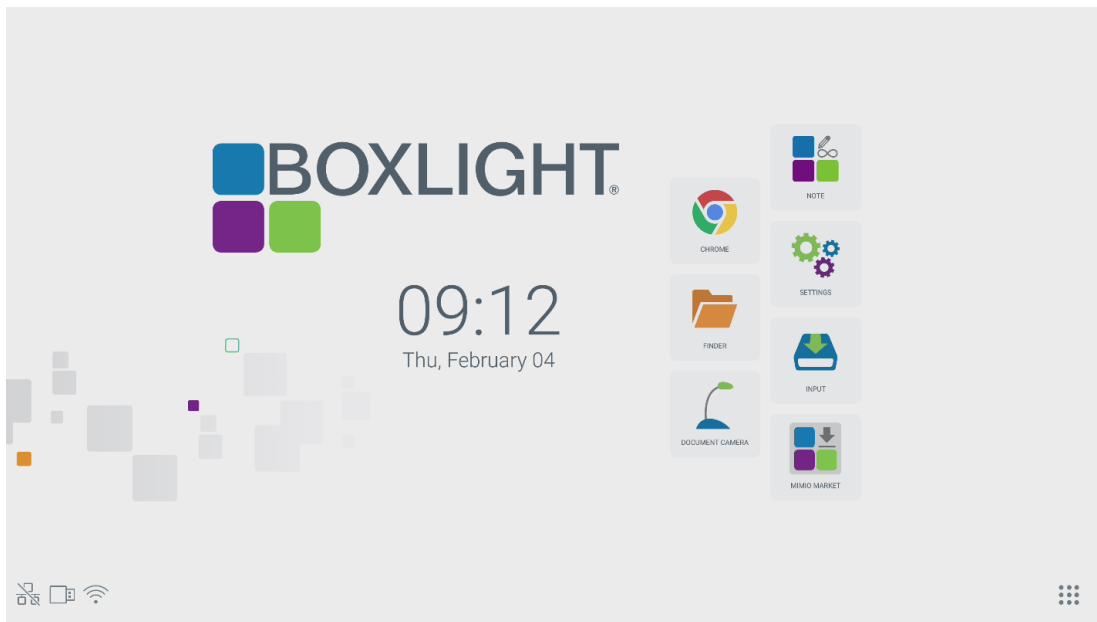

Please note: This is a common security feature on the panel that prohibits applications from installing apps without your permission. All apps in the MimioMarket store have been vetted and are safe for the classroom. Our App Team checks every app that is submitted to the store. There are three rules: no advertisements, no in-app purchases, and no inappropriate content.

Home Screen App Customization

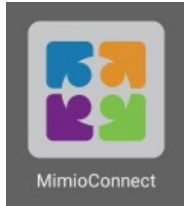

In this new release, users will have the ability to add up to 5 apps on the home screen on top of the standard applications.

- To add an App, press and hold the app icon on the All Apps page. Then drag and drop your selected application to the home screen.

New Home Screen Design, Plus Two New Apps

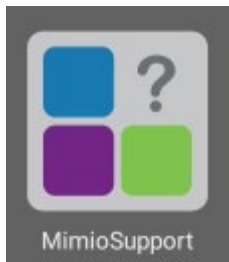

#1) MimioConnect App

With a click of a button access our new MimioConnect® Blended Learning Platform. This is an all-in-one teaching solution that allows you to create and deliver interactive lessons. Students can connect to a teacher-led or self-paced lesson using any web-enabled device. No matter where the student is, at home or in class, he/she will have access to the same materials and instruction at the same time. A perfect online solution for classroom, remote or hybrid teaching.

- Click on the icon to open.
- Follow these instructions for registering for an account or free trial:
<https://mimioconnect.com/kb/registration-instructions/>

#2) MimioSupport App

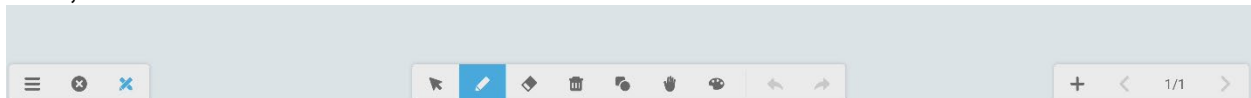

Need assistance? We are now just a click away. We have added a support short cut on your home page that will take you directly to the ProColor3 support page. Access videos, user guides, FAQs, or send our Customer Care Team a message.

A New Feature Has Been Added to the Notes App

Choose between a 2 pen, 2 color mode or the NEW Natural User Interface writing mode.

You will notice a slight difference in pen choices in the bottom left-hand corner.

2 Pen, 2 Color Mode

NEW Natural User Interface

The new design allows you to use natural gestures to draw, erase, and navigate the whiteboard.

- Write with small tip pen.
- Erase a small section using a finger, or the back of the pen.
- Use 2 fingers to move the page around to find space for more content.

Please Note: All of features remain the same in whichever mode the user is in.
